Manually creating a wireless connection to MONROECCC in Windows 7

*** Please complete the following at your own risk, this information is provided as a means to connect your computer to the “monroecc” wireless network if the standard method does not work. ***

1. Click on the wireless icon in the system tray.

2. Click on “Open Network and Sharing Center”.

3. Click on “Manage wireless networks”.

4. Click on “Add”.

---

*** Please complete the following at your own risk, this information is provided as a means to connect your computer to the “monroecc” wireless network if the standard method does not work. ***
5. Click on “Manually create a network profile”.

6. Enter the following information:
   - Network Name: monroecc
   - Security Type: WPA2-Enterprise
   - Encryption Type: AES
   - Check the box next to “Start this connection automatically”.
   - Click the “Next” button.

7. Click on “Change connection settings”.

   - Successfully added monroecc:
     - Change connection settings
       Open the connection properties so that I can change the settings.
8. Click on the “Security” tab at the top on the “monroecc Wireless Network Properties” window.

9. Once the “Security” tab information is displayed click on the “Settings” button next to “Choose a network authentication method”.
10. Scroll down the list of “Trusted Root Certification Authorities” and click the check box next to “GlobalSign Root CA”.

Click on the “Configure...” button next to “Select Authentication Method”.

11. Click on the check box in the “EAP MSCHAPv2 Properties” window to clear the check mark from the box.

Once the check mark is cleared, click on the “OK” button.
12. Once you return to the "Protected EAP Properties" window, click on the "OK" button.

13. Once back at the "monroeccc Wireless Network Properties" window click on the "Advanced settings" button.
14. Once the “Advanced settings” window appears, place a check mark in the “Specify authentication mode:” check box.

From the “User or computer authentication” drop down list, select “User authentication”.

Click on the “Save Credentials” button.

15. Once the “Windows Security” window appears, enter the following:

Username = mcccguest
Password = guestmccc

Once you have entered the username and password, click on the “OK” button.
16. Select the “OK” button on the “Advanced settings” windows to close it.

17. Select the “OK” button on the “monroecc Wireless Network Properties” window to close it.
18. You can also close the “Manage Wireless networks” window that is open by clicking on the red “X” in the upper right corner of the window.

19. Open a web browser and place a check mark in the “I accept the terms of use” checkbox located in the bottom left corner of the MCCC Guest Wireless page that comes up by default.

Once you have checked the box, click on the “Continue” button.

At this point you have completed the manual configuration.
