FOR IMMEDIATE RELEASE

MCCC TO HOLD WORKSHOP FOR PEOPLE INTERESTED IN USING SOLAR POWER

MONROE – The Monroe County Community College’s Office of Lifelong Learning is holding a Solar Workshop for people who are interested in reducing their electric bill through the use of solar power.

The workshop takes place in Room 259 of the La-Z-Boy Center on Saturday, Oct. 22 and Saturday, Oct. 29 and runs from 9 a.m. to 3:30 p.m. both days.

Solar applications for homeowners, farm operators and small businesses will be discussed.

Attendees will learn what a photovoltaic cell is, the advantages of different module types and how to size a system. They will also gain an understanding of how a solar system works, including developing the right system for a specific application, learning the necessary components and system balance, and identifying the different types of installations and necessary components.

Site viability will also be addressed, including improvements that can be made to make a location more viable for solar power usage.

The cost of the course is \$149 (\$87 for seniors).

To register, call the Office of Lifelong Learning at (734) 384-4127.
