

MCCC - Security Incident

Date: 3 Mar 2015

Time: 15:40:00

Reporting Officer: roetjens

Subject: Malicious Destruction of Property

Location: CTC - Automotive Lab

Witness:

Victim: MCCC

Complainant: Instructor

Suspect: Unknown

Narrative:

Damaged: One plastic computer monitor base.

Summary: Instructor called the Security Office at 3:40PM, Tuesday, 3/3/15, to make this report. Writer responded to the Automotive Lab and met instructor.

Instructor stated he left the lab about 6PM, Monday night, 3/2/15 and the monitor stand was intact. He returned about 12:30PM, today, 3/3/15, and noted the door was wedged open.

Instructor indicated welding assistant had wedged the door open to borrow a charger from the lab. He added the Welding instructors frequently borrow a charger, tools, etc. He did not notice if the monitor stand was damaged at that time or not.

Instructor left and returned at about 1PM, when he notice the monitor stand was damaged.

It is possible the monitor may have been knocked or fell over, but Instructor believes it was probably vandalized. It is noted a camera points right at the monitor area, so this may have been a test by someone to see if the cameras are activated.

Instructor advised IT is aware and is going to replace the stand. He noted nothing else to have been tampered with or taken.

Status: Open - Writer is to determine if cameras are activated yet. Also, welding assistant needs to be interviewed.
