In collaboration with your company, Monroe County Community College can create training and retraining programs to meet the changing dimensions of skills in today’s workplace. Whether your company needs training in supervision/management, a new manufacturing process, software applications or basic skills, representatives from the college can work with members of your staff to develop a customized training program tailored to meet the specific needs of your employee groups. The list of potential programs is virtually endless, offering the greatest flexibility. The training can take place at your office or plant or at the college on a time schedule convenient to your company and employees. The high-quality, customized programs provided locally by MCCC are very cost-effective for training your employees.

**MCCC is pleased to be part of the MIOSHA TRAINING INSTITUTE** and offer a wide variety of safety training courses. Most of the safety training topics can be delivered at your worksite or on campus. To receive a detailed brochure of the safety training classes available, contact the Office of Lifelong Learning at 734.384.4127 or visit the Division of Corporate and Community Services’ Web site at www.monroeccc.edu/ccs/training.htm

Usually, contracted training is delivered in a much shorter time frame than regular college classes and, typically, no college credit is earned towards a degree. However, if a company would want a program for college credit, this can be delivered at your site or at either of our campus locations.
